CLOUD COMPUTING

Pooja Jain
Assistant Professor (Information Technology),
Jain vishva Bharati Institute, Dist: Nagaur, Ladnun.

Short Profile

Pooja Jain is working as an Assistant Professor (Information Technology) at Jain vishva Bharati Institute, Dist: Nagaur, Ladnun.

ABSTRACT:

Cloud computing is a type of computing that relies on sharing computing resources rather than having local servers or personal devices to handle applications. In cloud computing, the word cloud (also phrased as "the cloud") is used as a metaphor for "the Internet," so the phrase cloud computing means "a type of Internet-based computing," where different services — such as servers, storage and applications — are delivered to an organization's computers and devices through the Internet.¹

Cloud computing has been an important term in the world of Information Technology (IT). Cloud computing is a kind of computing which is highly scalable and use virtualized resources that can be

shared by the users. Users do not need any background knowledge of the services. Cloud computing uses the Internet and central remote servers to maintain data and applications.²

KEYWORDS

Cloud computing, sharing computing resources, Information Technology (IT).
